OF THE REVENUE OF 1883.

Treasury Instructions of 1847

Revenue, General Causes of Increases or Decreases, above £ 100

- A. The great imports of inferior wine during 1883 have caused this increase.
- B. This increase is due to the quarantine imposed last summer on all arrivals from the Mediterranean Ports.
- C. This difference is owing to the non-demand for Government lands by the Military Authorities for improvement of Military Defences.
- D. The new valuations have raised these receipts.
- E. This decrease is consequent on the reduction in the rent of some of the Market Stalls, as well as on the non-payment of the lease of the Auberge d'Aragon, pending the settlement on the conditions of that lease.
- F. Chiefly attributable to the low receipts in the Courts of Country Districts.
- G. This increase is due to the unusual number of certificates issued by the Port Department in consequence of the late quarantine.
- H. The receipts under this Head were in 1882 abnormal, having been augmented by a subsidy from England of £ 6,536 10 for the relief of the refugees from Egypt.
- I. Attributable to a payment of a penalty for breach of Contract by the "Compagnie Transatlantique."
- J. This difference is due to the dividends on further investments in 3% Consols.
- K. Attributable to the new valuations of the Property of Pious Foundations.
- L. Decrease in 1883 £ 317 4 6½.

STATEMENT OF THE EXPENDITURE OF 1883.

Treasury Instructions of 1874.

Expenditure, General Causes of Increases or Decreases, above £ 100

A. Increase attributable to the increments of Salaries on the Clerical Establishment.

B. The annual rate of pensions granted in 1883 amounted to £ 1,573 6 2; that of pensions lapsed in the same year amounted to £ 1,384 19 7.

C. This decrease is due to the reduced expenses connected with the maintenance of Maltese prisoners abroad.

D. This increase is caused by the expenses incurred on account of distressed Maltese abroad.

E. This difference is in the expenses of clothing and medicines.

F. Attributable to the increased expenses in connection with sanitary purposes.

G. This decrease is caused by the discontinuance of the Mail Service of the "Compagnie Transatlantique" and by the suspension during last summer of the subsidy to the Florio Company.

H. }
I. } These differences depend on the services undertaken and their cost.

J. Attributable to the expenses incurred in 1882 for the relief of the Refugees from Egypt.

K. This difference is due to the payment of interest on further deposits in the Savings' Bank, and to the payment of accumulated interest on Capitals of the "Massa Frumentaria."

L. This increase is consequent on the non-payment of the fourth quarterly contribution in 1882.

M. Attributable to the larger quantity of Manufactured grain exported.

N. Decrease in 1883 £ 21,996 4 5½.

MODE OF ELECTION, *Vide Ordinance No. I of 1861, and No. X of 1880.*

A list, subject to revision, of persons deemed qualified to vote for the election of Members to serve in the Council of Government is published in the Government Gazette. A Court of Revision composed of two Magistrates holds sittings to receive claims, consider objections &c., which must be made within 10 days of the date of the Government Notice notifying the Election. A rectified list of persons entitled to vote is then again published in the Gazette. The Head of the Government appoints by a Notice in the Government Gazette not less than three Commissioners to conduct the election. The said Commissioners prepare, and cause to be delivered to each elector, certificates declaring said elector entitled to vote. A Government Notice is published fixing the days and places of the election and appointing the Assistant Commissioners. On presentation at the appointed places of the said certificate by the elector therein mentioned, he is provided by the Assistant Commissioner with a ticket on which he writes the names of the persons for whom he votes.

At a GENERAL election for MALTA each elector has the right of naming four persons for whom he votes.

Sections I, II of Letters Patent dated March 2, 1883.

I. No person shall be qualified to be elected a Member of the said Council of Government if he has at any time been convicted of treason or any infamous crime, nor unless.

(1) he possesses immoveable property situate in Malta or its Dependencies of the clear value of one hundred pounds sterling money above all charges and encumbrances affecting the same, and has possessed immoveable property in Malta or its Dependencies to that value for at least twelve calendar months next before the election; or

(2) rents immoveable property situate in Malta or its Dependencies of the yearly value of ten pounds sterling money, and has rented property in Malta or its Dependencies to that value for at least twelve calendar months before the election; or

(3) being the occupant of any room or lodging in Malta or its Dependencies, has paid for his board and lodging at least forty pounds sterling money yearly, or for his lodging only at the rate of at least ten pounds sterling money yearly, and has continuously paid such amount for board and lodging, or for lodging only for at least twelve calendar months before the election:—

nor unless, besides possessing some one of the foregoing qualifications, he has not for at least five years before the election been in receipt of any charitable relief from public sources.

II. If any person hereby declared to be disqualified for being elected a Member of the said Council shall nevertheless be elected, his election shall be void, and the Council may declare his place in the said Council to be vacant, and thereupon another person shall forthwith be elected in his stead; and if any such person shall sit or vote in the Council as an elected Member, he shall, for every day on which he sits or votes, forfeit the sum of fifty pounds sterling money, to be recovered by action in the First Hall of Her Majesty's Civil Court by any person who shall sue for the same.

IMPORTS AND EXPORTS.

1883.

Memoranda referring to the following Returns of Imports and Exports.

1. IMPORTS.

These Returns include only articles subject to duty. There are no available sources from which to calculate, even roughly, the values and quantities of other Imports.

2. EXPORTS.

There is no Export duty. These Returns include only articles subject to Import duty, which are exported in same bottoms or from bond, or were transshipped.

3. The general average prices of the various Imports have been obtained from the most reliable sources, that is, from Firms of long standing, and from Public Brokers of experience.

4. *B.* denotes Barili — a Maltese Barile = $9\frac{1}{2}$ Imperial Gallons.

C. „ Caffisi — a Maltese Caffiso = $4\frac{1}{2}$ do.

Ca. „ Cantara — a Maltese Cantaro = 175 lbs. English.

N. „ Number.

S. „ Salme — a Maltese Salma = 1 Imperial Quarter.

5. There is no special “Entry for Home Consumption.” The items under that column are the quantities released for consumption, and include articles which were in bond previous to 1883, so that they will not tally with those in the column of Imports of that year.

6. The Imports and Exports (Tables 1A and 1B) show the value of the quantities — “*actually brought into the Island,*” distinct from those “*reexported in the same bottoms, or transshipped,*” as required by the Circular Despatch of the Secretary of State dated 29 June 1875.

7. Items with *Asterisk* are quantities which proceeded in the same bottoms.

(a) There are no means of officially stating what amount of articles of Island Produce and Manufacture is exported, but the quantity if any, is very small.

Memoranda referring to the following Returns of Imports and Exports.

1. IMPORTS.

These Returns include only articles subject to duty. There are no available sources from which to calculate even roughly, the values and quantities of other Imports.

2. EXPORTS.

There is no Export duty. These Returns include only articles subject to Import duty, which are exported in the same bottoms or from bond, or were transshipped.

3. The general average prices of the various Imports have been obtained from the most reliable sources, that is, from Firms of long standing, and from Public Brokers of experience.

4. *B.* denotes Barili — a Maltese Barile = $9\frac{1}{2}$ Imperial Gallons.

C. „ Caffisi — a Maltese Caffiso = $4\frac{1}{2}$ do.

Ca. „ Cantara — a Maltese Cantaro = 175 lbs. English.

N. „ Number.

S. „ Salme — a Maltese Salma = 1 Imperial Quarter.

5. There is no special “Entry for Home Consumption.” The items under that column are the quantities released for consumption, and include articles which were in bond previous to 1883, so that they will not tally with those in the column of Imports of that year.

6. The Imports and Exports (Tables 1A and 1B) show the value of the quantities — “*actually brought into the Island,*” distinct from those “*reexported in the same bottoms, or transshipped,*” as required by the Circular Despatch of the Secretary of State dated 29 June 1875.

7. Items with *Asterisk* are quantities which proceeded in the same bottoms.

Corradino Prison.

Questions.

Answers.

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

This Prison is on the Mixed cellular system as regards the criminal wards. The separation is complete as regards two of the five Sections under which the prisoners are classed, viz., A and B. In Section C association is allowed for 3 hours daily in the yards, but with *strict silence*, separation being enforced during the remaining hours. In Section D conversation for one hour per day is also allowed with another prisoner designated by the Superintendent. In Section E association and conversation are allowed during the day in the yard appropriated to the Section. By night the Separation is complete for all prisoners in the criminal wards. In the ward for prisoners sentenced to simple "Detention," there is a general association during the whole day; and at night, each cell is appropriated for 4 prisoners.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The prisoners, while in association, are supervised by two or more Warders according to the number composing the Section.

III. How many cells are there; and how many associated wards?

There are 160 separate cells, and 20 cells for four prisoners each, in the "Detention" ward. There is no associated ward. An additional ward for Juvenile Prisoners has been completed lately, and is now in use, containing 12 cells for one prisoner each.

IV. Taken the *average* number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

In the criminal wards there are 1,120 cubic feet of space for each prisoner in 32 cells, and 1,260 cubic feet in the other 128 cells. In the Detention wards, where each cell is constructed for *four* prisoners, there are 535 cubic feet for each prisoner. But these latter, viz., the "Detention" cells, are sometimes occupied by 5 or 6 prisoners each.

V. How are the prisoners classified?

In five Sections from A to E inclusive; not less than 6 months good conduct are required before passing from one system to another of less severity.

Questions.

Answers.

VI. Is penal labour—that is, labour by treadmill, crank, or short drill—in force?

No.

VII. If so, during what periods of imprisonment, in respect of what classes of prisoners and during how many hours, is such penal labour enforced? In stating hours of tread wheel labour, give, first, the total time on and off at the wheel, &c., secondly, the length of spells and intervals of rest.

See Answer No. VI.

VIII. What kind of labour, other than penal labour, is in use?

Building, Stone-cutting, Weaving, Carpentering, Glazing, Painting, Colouring; and Tailoring and Mat and Broom-making in the cells.

IX. If the prisoners are employed beyond the wall of the gaol, state—

- 1. On what kind of work they are so employed?
- 2. How are they supervised?
- 3. How many escapes of prisoners while being employed beyond the gaol, have taken place during each of the last three years?
- 4. How the profits of their labour are accounted for?

The prisoners are not employed outside the gaol as a rule; but when stone is required, well conducted men are employed in quarrying outside the Prison, supervised by one or more Warders and a Sentry.

No escapes have taken place.

Lodged in the Colonial Treasury.

RETURN of the GAOLS, &c.—*continued.***Valletta Prison, (in the Palace of the Courts of Justice).***Questions.**Answers.*

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

This Prison is intended for the detention of persons sentenced to imprisonment for periods not exceeding three days.

Also for the temporary detention of—

1. Persons apprehended, until taken before the Magistrates?
2. Persons under examination by the Magistrates;
3. Persons committed for trial before H. M. Criminal Court;
4. Persons sentenced to find security against breaches of peace, and for future good behaviour or who have not given such security.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The prisoners are kept separate only when under examination or committed for trial.

They are occasionally supervised by the Keeper of the Prison.

III. How many cells are there; and how many associated wards?

There are 16 cells.

IV. Taking the *average* number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

Considering that in the front wall of each cell there is a large opening looking into the adjoining yard, and the consequent continued admittance of pure air, besides the ventilators leading to the roof of the prison, no possible doubt can be entertained of the prisoners breathing foul air, or being in any way too closely confined.

V. How are the prisoners classified?

The object of this prison does not admit of any particular classification.

VI. Is penal labour—that is, labour by treadmill, crank, or short drill—in force?

This prison is not intended for convicts condemned to labour.

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

This prison is not on the separate system. The prisoners are divided according to the nature of their sentence, viz. hard labour, imprisonment, and detention, there being two rooms for each of the 1st and 3rd classes, and one for the 2nd.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

A Sister of Charity is constantly in the prison to supervise the prisoners' conduct.

III. How many cells are there; and how many associated wards?

See Answer to question No. I.

IV. Taking the *average* number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

There are 1,142 cubic feet of space for each prisoner in the detention room, 1,440 in the imprisonment room, and 2,019 in the hard labour room.

V. How are the prisoners classified?

Into three categories, viz. those condemned to detention, those condemned to imprisonment, and those condemned to hard labour.

VI. Is penal labour—that is, labour by treadmill, crank, or short drill—in force?

No.

VII. If so, during what periods of imprisonment, in respect of what classes of prisoners and during how many hours, is such penal labour enforced? In stating hours of tread wheel labour, give, first, the total time on and off at the wheel, &c., secondly, the length of spells and intervals of rest.

XVII. What provision is made for the education of prisoners?

XVIII. On what conditions are remissions of imprisonment granted?

Answers.

From eight to nine hours. They sleep in association, with lighted dormitories, and are generally patrolled once, but oftener when the number and general conduct of the prisoners render it advisable.

Four cases of punishment have taken place during the year. Such punishment consisted, in the reduction of rations.

There are two Roman Catholic Chaplains attached to the Asylum for the aged and infirm, and they perform duties likewise in the prison. Clergymen of other persuasions visit the prison when required.

Religious services of the Roman Catholic Church are regularly performed for the benefit of the prisoners, who are all, generally, of that persuasion.

Roman Catholic Priests are constantly on the spot, and other ministers are allowed free access at their request or at that of the prisoners.

Only Catholic Religious Instruction is imparted to the prisoners through Sermons and the Catechism or Christian Doctrine.

Remissions of imprisonment are granted, or withheld, by His Excellency the Governor, after a written opinion by the Judge or Magistrate who has dealt with the case.

Answers.

This prison is intended for the temporary detention of prisoners under examination or trial, condemned men, condemned women, condemned boys, and debtors.

The prisoners are kept separate only when under examination.

They are occasionally supervised by the Keeper of the prison.

There are four cells and three wards, two of which wards with airing-yards attached.

Both the cells and the wards being very spacious, and considering the limited number of persons detained in the same, no possible doubt can be entertained of the prisoners being too closely confined.

The object of this prison does not admit of any particular classification.

This prison not being one for convicts sentenced to labour, prisoners are not put to labour.

Central Hospital.— (*continued*).QUESTION II — (*continued*).

(I.) What quantity of Water is available for each Patient every day?

Any quantity, as the "supply cistern" is directly connected with the Aqueduct which supplies the town.

What is the source of the Water Supply?

A natural spring, at a distance of about nine miles from the town, which is conveyed by an Aqueduct in the old Roman Style.

What is the quality of the Water?

Good in every respect.

(II.) Detail the arrangements as to Baths and Lavatories.

The Baths (Rufford and Finch's 1st class porcelain Baths) are conveniently situated both for depuration on admission, and for ablution or cure during stay in Hospital. Two lavatories (Jenning's Lift up Lavatories) exist, one in each division. The outlet pipes of Baths and Lavatories are completely disconnected by discharging no gully traps in the open air.

(III.) What is the system of Sewerage, and what the condition of the Privies?

Water system. The privies are separated from the Wards and Corridors by means of ante-rooms thoroughly ventilated.

HOSPITAL RETURNS, for the year 1883.

Central Hospital.— *(continued)*.QUESTION II — *(continued)*.

(I.) What quantity of Water is available for each Patient every day?

Any quantity, as the "supply cistern" is directly connected with the Aqueduct which supplies the town.

What is the source of the Water Supply?

A natural spring, at a distance of about nine miles from the town, which is conveyed by an Aqueduct in the old Roman Style.

What is the quality of the Water?

Good in every respect.

(II.) Detail the arrangements as to Baths and Lavatories.

The Baths (Rufford and Finch's 1st class porcelain Baths) are conveniently situated both for depuration on admission, and for ablution or cure during stay in Hospital. Two lavatories (Jenning's Lift up Lavatories) exist, one in each division. The outlet pipes of Baths and Lavatories are completely disconnected by discharging no gully traps in the open air.

(III.) What is the system of Sewerage, and what the condition of the Privies?

Water system. The privies are separated from the Wards and Corridors by means of ante-rooms thoroughly ventilated.

HOSPITAL RETURNS for the year 1883.

QUESTION III.

Number of Visits of Inspection paid to the Hospital during the year 1883.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment	The Hospital was visited several times by the Chief Secretary, always by surprise.	The visits of the Comptroller are always sudden, and take place very often.	This Hospital was visited by the Commissioners of Charity several times during the year.
Of Surprise			

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

On one occasion few prescription tickets and several entries in the Register of admissions and discharges were found not signed by the Medical Officers, and some prescription tickets not filled up.

On a second occasion the omission of certain signatures were detected in the Chaplain's book. And on two occasions one of the books of the Dispensary was not found up to date.

(III.) State also how many Reports of the following kinds have come under the notice of the Governor:—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which Money and Store Accounts are kept and audited.
- (b) Reports by Persons charged with the immediate management of the Hospital.
- (c) Report by a Government Inspector, independent of the Governing Authority of the Hospital.

(Append copies of his Reports, if any).

These queries are not applicable to Malta, as all the Charities in the Island are under the management of one head Officer (the Comptroller of Charitable Institutions), who corresponds with the Governor, through the Chief Secretary, as often as occasion may require, on all questions connected with every detail or organization, discipline, and finance. Periodical reports are, therefore, considered unnecessary, as information on all points can be instantly obtained, when asked for.

Santo Spirito Hospital — *(continued)*.QUESTION II — *(continued)*.

(I.) What quantity of Water is available for each Patient every day?

Any quantity, which may be required.

What is the source of the Water Supply?

A natural spring, which is situated in the neighbourhood.

What is the quality of the Water?

Very good, being filtered naturally through the rock, before reaching the Hospital.

(II.) Detail the arrangements as to Baths and Lavatories.

There is Rufford and Finch's porcelain Bath in the Male division, and a zinc Bath in the Female division. There are no lavatories but portable basins are used.

(III.) What is the system of Sewerage, and what the condition of the Privies?

The Sewerage consists in channels, cut in the rock, without any cement, and terminating in a cess-pit, at a short distance from the Hospital. The privies are fitted with Mac Farlane's Water-closet Ranges.

All drain openings are trapped.

QUESTION III.

Number of Visits of Inspection paid to the Hospital during the year 1883.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment	None	The Comptroller of Charitable Institutions visits often this Hospital; always by surprise.	This Hospital was visited once by the Commissioners of Charity
Of Surprise	Twice		

(I) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The registers are inspected during the year, in the performance of one or other of the administrative duties.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

They were always found up to date.

(III.) State also how many Reports of the following kinds have come under the notice of the Governor:—

(a) Reports of a Financial and Statistical kind, especially such as show the system on which Money and Store Accounts are kept and audited.

(a) These Reports have never been called for by Government, but Registers are kept which show every detail for any kind of Statistics.

(b) Reports by Persons charged with the immediate management of the Hospital.

(b) The Medical Officers in charge of the Hospital send periodically professional reports, and correspond as often as may be required, on all matters connected with administration and discipline: but no annual report is prepared which describes generally the "work done" by the Institutions, as is the practice in England.

(c) Report by a Government Inspector, independent of the Governing Authority of the Hospital.

(c) No report of this kind has ever been prepared as the Comptroller of Charitable Institutions is held responsible to Government for every detail of administration and discipline, and is in constant communication with the Governor, through the Chief Secretary.

(Append copies of his Reports, if any).

HOSPITAL RETURNS, for the year 1883.

Gozo Hospital — *(continued)*.QUESTION II — *(continued)*.

(I.) What quantity of Water is available for each Patient every day?

Any quantity, as the underground tank for the service of the Institution is sufficiently large to contain the rain-fall ; and is, besides, nourished by the aqueduct.

What is the source of the Water Supply?

The rain-fall and a spring at a short distance conveyed to the town of Rabato by an aqueduct.

What is the quality of the Water?

Good. It is filtered naturally through rock and soil, before being collected into a stream, and conveyed in stone channels, on a level, lying on arches, in the manner of the Romans.

(II.) Detail the arrangements as to Baths and Lavatories.

There are no baths, or lavatories. The patients are bathed in a moveable bath, and use basins for a personal cleanliness.

(III.) What is the system of Sewerage, and what the condition of the Privies?

The dry-earth system is in use in this Hospital. Moule's earth-system is now applied to the same.

HOSPITAL RETURNS for the year 1883.

QUESTION III.

Number of Visits of Inspection paid to the Hospital during the year 1883.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment	The Chief Secretary visited this Hospital once by surprise.	The Comptroller of Charitable Institutions visited the Institution six times during the year, always by surprise.	The Commissioners of Charity for Gozo visited the Hospital twice during the year,
Of Surprise			

(I) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

When the Comptroller or his delegate visits the Institution, an inspection of every thing takes place, and Memoranda and Instructions are left, for the guidance of the local officers.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

On one occasion few items of bedding and clothing were found omitted to be entered in the conversion account.

(III.) State also how many Reports of the following kinds have come under the notice of the Governor:—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which Money and Store Accounts are kept and audited.
- (b) Reports by Persons charged with the immediate management of the Hospital.
- (c) Report by a Government Inspector, independent of the Governing Authority of the Hospital.

(Append copies of his Reports, if any).

The Deputy Comptroller is in charge of the Institutions in Gozo, and is responsible to the Comptroller for all details of expenditure and management. Correspondence daily takes place between these two officers on all points, to ensure the efficiency of the Establishment.

HOSPITAL RETURNS, for the year 1883.
